Hi Jayne,

I processed the modification yesterday, and is in the process of being reviewed by the CO. I'll be sure you get a copy of the mod once it is released and signed by Noelle.

Thanks,

Erin M. Ridder

**Subject:** EAS PR-R0-13-00002 to Fully Fund Cadmus EP-C-08-002 Task Order 25

Hi Erin,

It is important that this action be completed before the end of October. It took a while to go through HQ as we were requesting they advance us FY13 funding.

The concern with a delay in receiving new funding is that the current funding in the task order runs out at the end of October. New funding will allow the planned November meetings of the Stakeholder Advisory Committee and the temperature, sediment, and bacteria Technical Working Groups to proceed because the contract pays for the organizing, planning, and facilitation of these meetings. Not having the funds would prevent holding the November meetings which would be very disruptive to the Mid-Coast TMDL process. It's a pivotal time for the project since the stakeholder and technical workgroups are in the middle of discussing the sediment and temperature TMDL model results and the forestry and ag practices needed to meet the TMDLs. Also, one of the CZARA Settlement Agreement dates to report on the progress of the Mid-Coast TMDL BMPs is due in December 2012. Contractually, this action will fully fund the existing task order.

We have a second action PR-R0-13-00006 to add LOE to this Task Order 25 which I believe has been assigned to you. We rank this action as a lower priority than the one described above.

Thanks for your understanding.

Cheers,

Jayne
